

Helios Homoeopathy Ltd Remedy List.

Our remedies are listed in alphabetical order and gives an indication of potencies available in both the centesimal [C] and decimal [X] dilutions. The potencies are centesimal unless otherwise stated.

Where the range indicates decimal potencies available, the highest will be 12X

If no X potencies are listed, the remedy is only available in centesimal potencies.

Where the remedy is insoluble this is indicated by and "i" prefix, and the remedy has been prepared by trituration.

In this case 6X would refer to oral dose forms, and not medicating potencies.

We also supply many of our remedies in LM potencies, and whilst not indicated here, as a guide, if the lowest potency available is 6X or 3C it should be possible to supply LM potencies.

We are constantly up dating the remedy list and potency ranges. If you do not see what you want here, please do contact us.
